

# Decorative Flooring Care Guide

## Protect and Maintain your floors with 4 easy Steps

1

Floors must be swept daily. A standard dust mop is appropriate. Wax based sweeping can be used if necessary. DO NOT use oil based compounds.

2

When a spill occurs, immediately mop the area using Prosoco LSKlean Ultra or other appropriate polished concrete cleaner.

3

All polished concrete floors should be cleaned weekly with an auto scrubber using Prosoco LSKlean Ultra or appropriate solution. Only white scrubbing pads should be used.

4

Polished concrete floors should be burnished 2 times per year with a high speed propane burnisher and diamond impregnated pads.
